

Trends and implications in local government climate adaptation disclosure

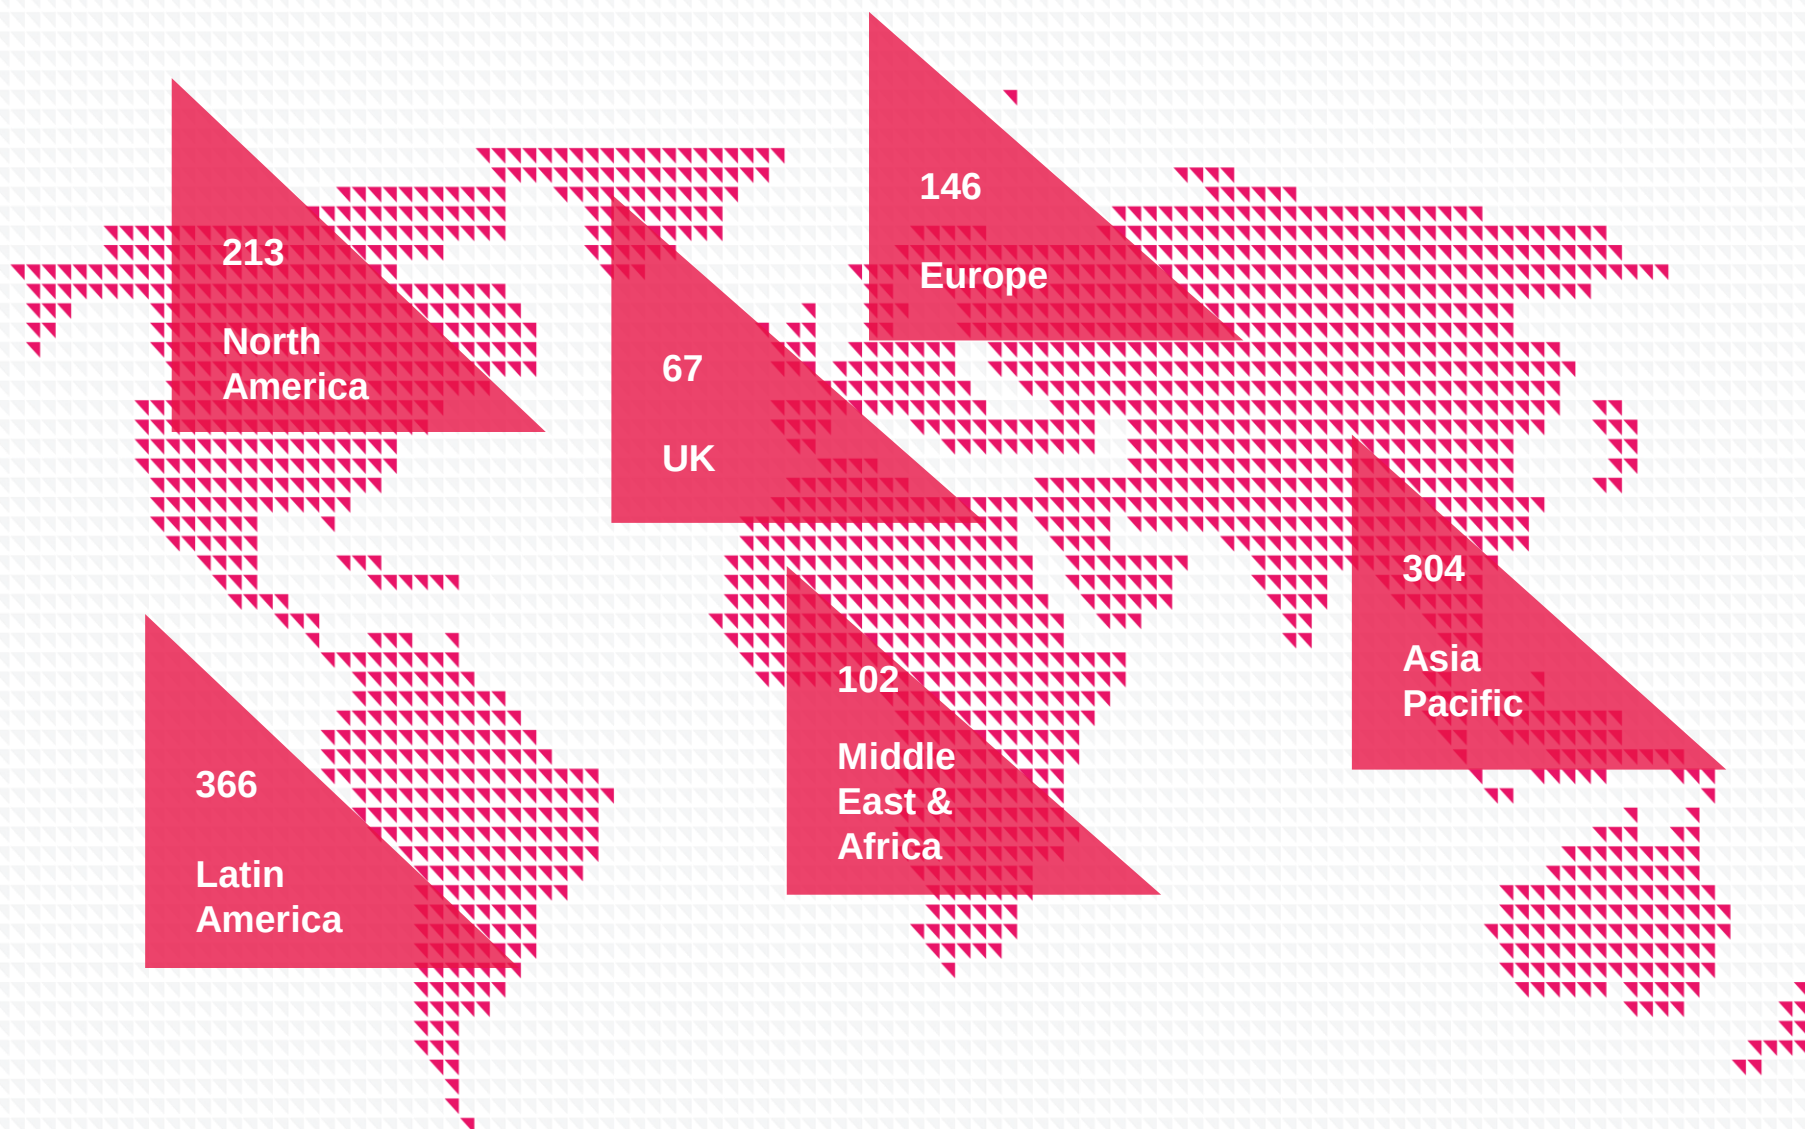

Maia Kutner

Global Director, Cities, States and Regions

3 December 2023

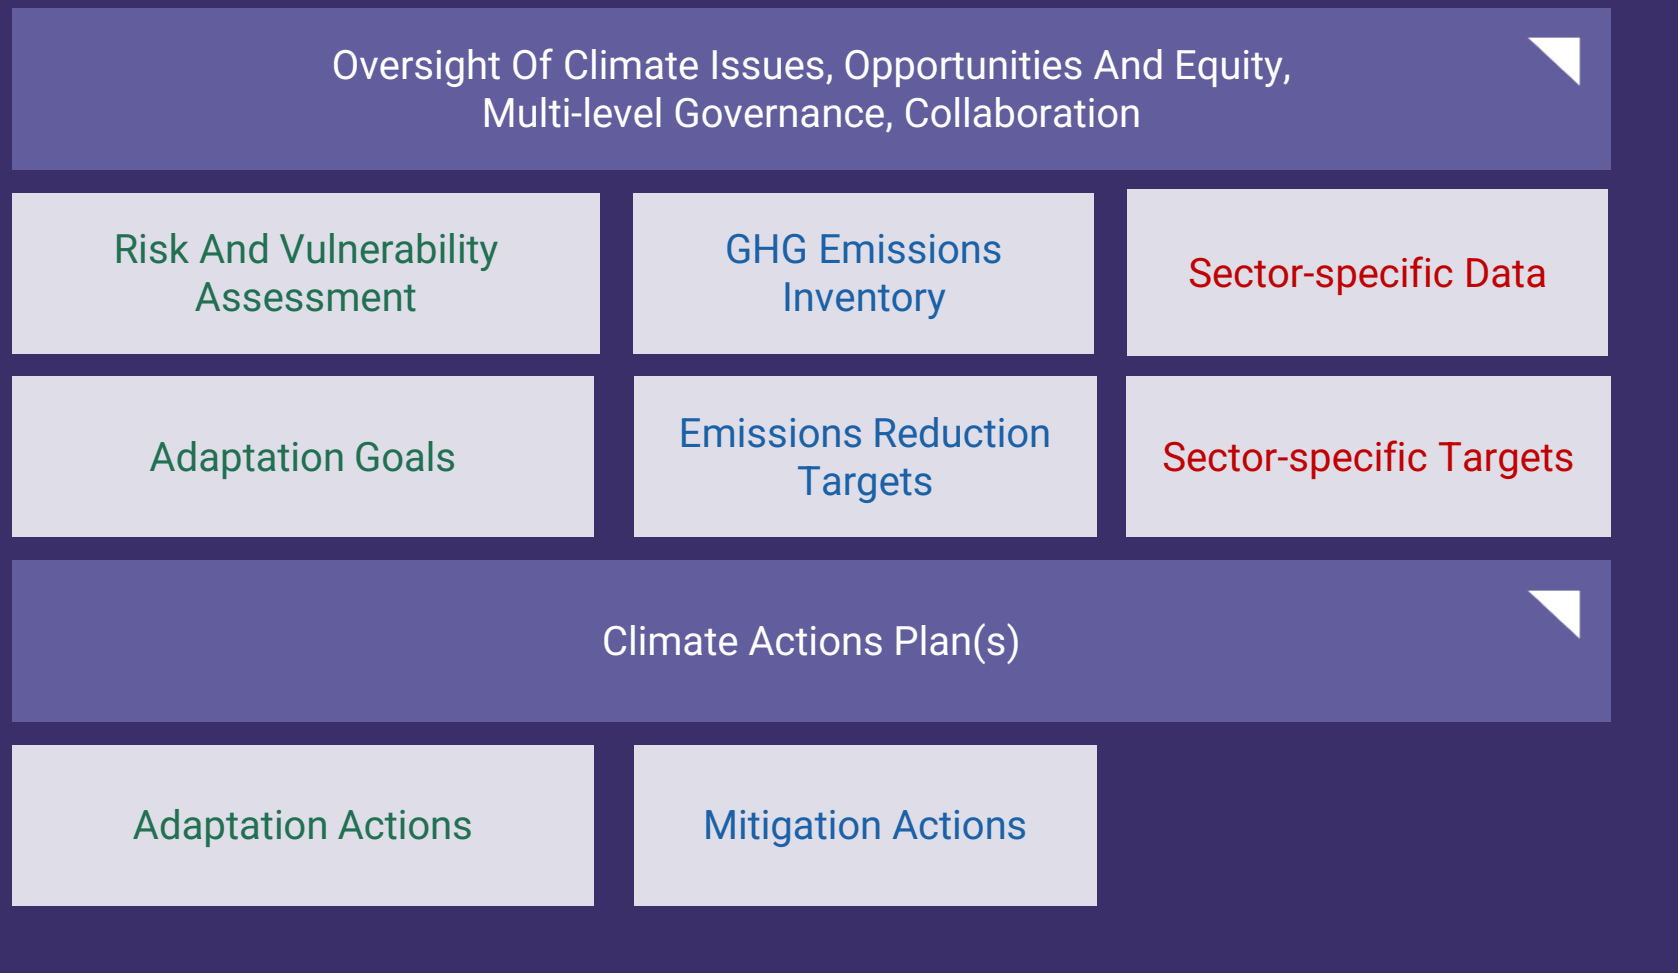

ABOUT CDP

**Over
1100**
Cities, states and
regions disclosed
through CDP in 2023
across almost 100
countries

Cities Questionnaire Structure

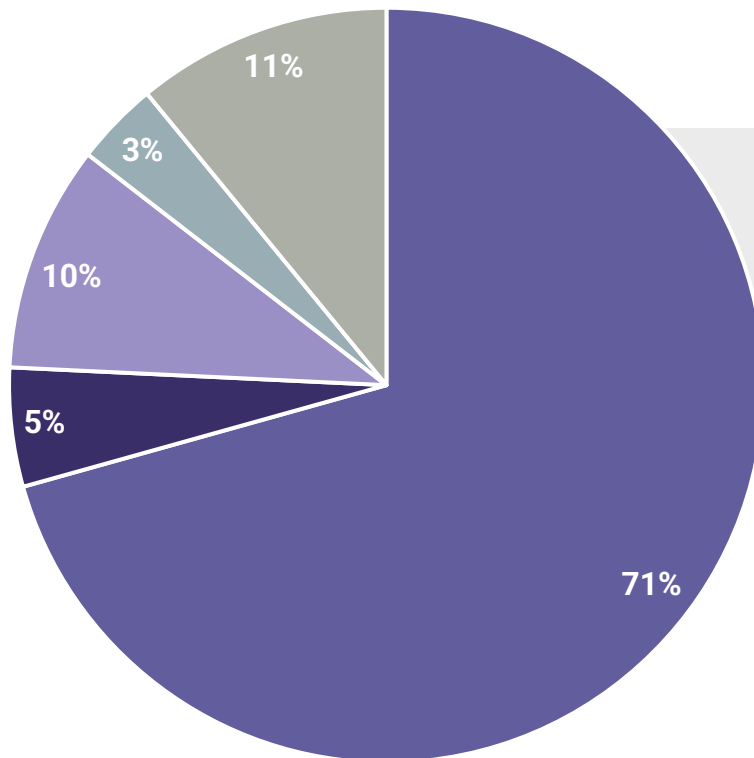

Framework Alignment

Assessment

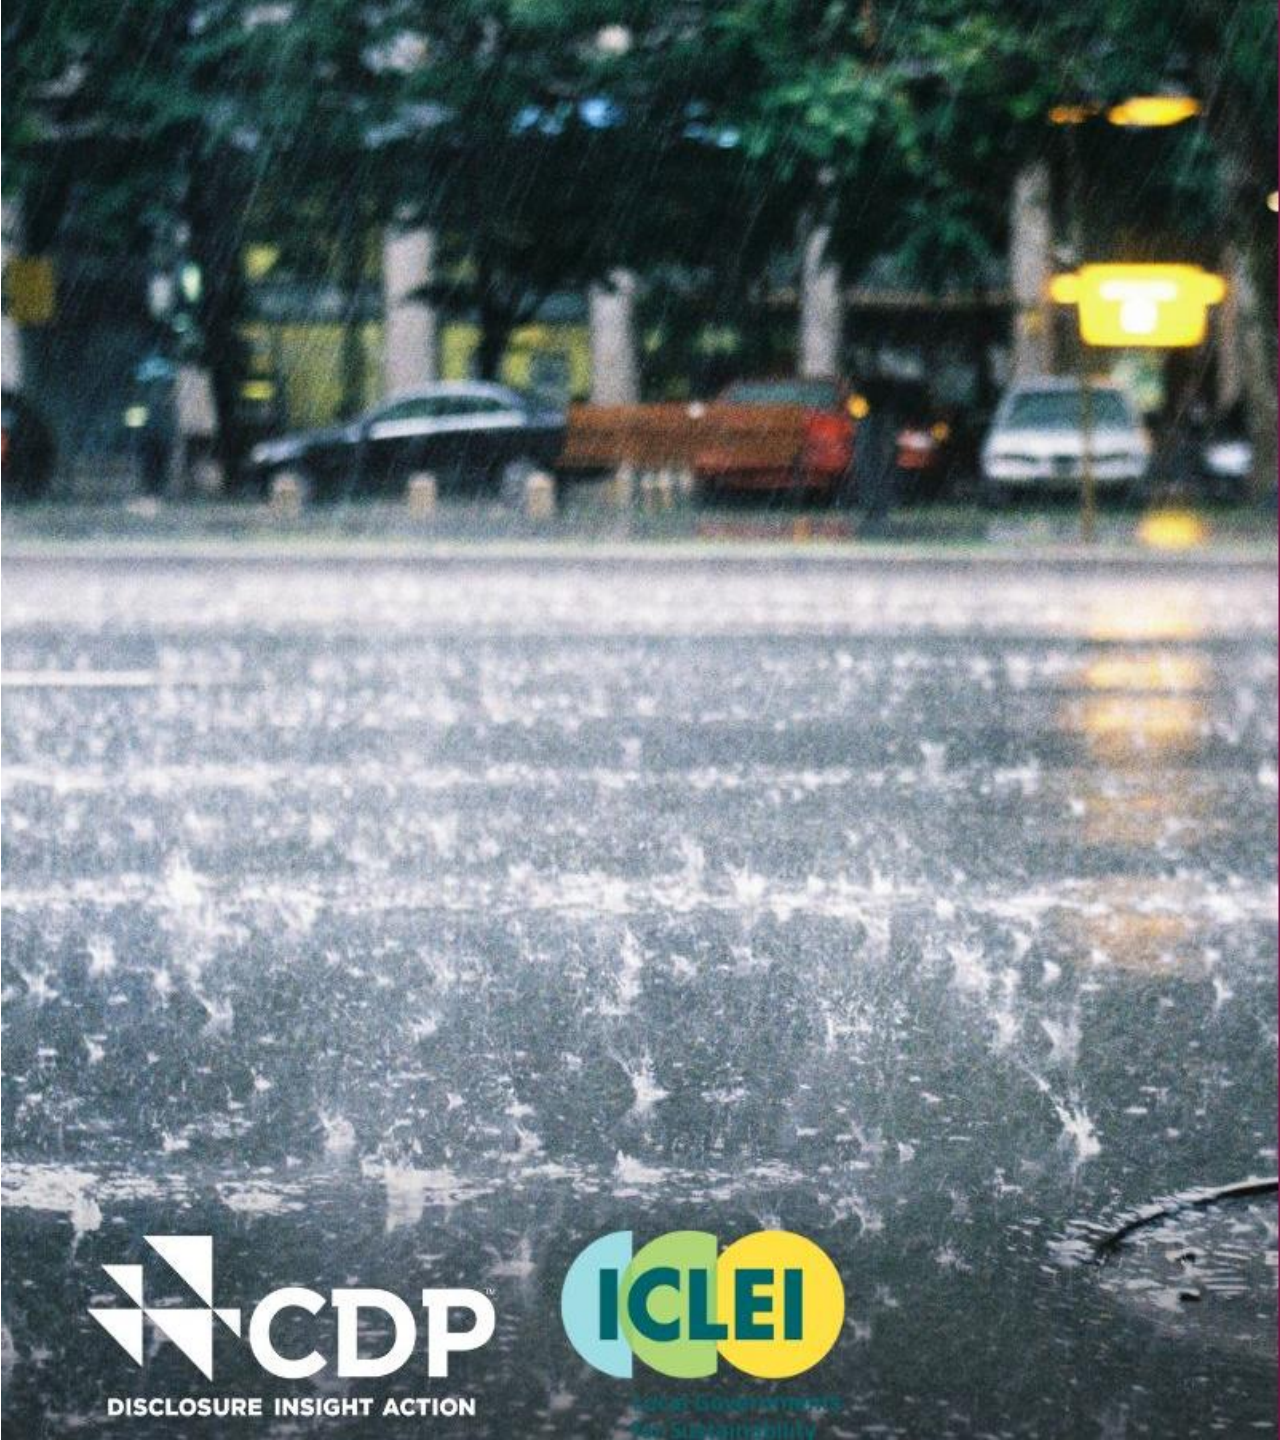

Climate risk and vulnerability assessment

- Yes
- No, but currently undertaking
- No, but intending to undertake
- No, and not intending to undertake
- No response

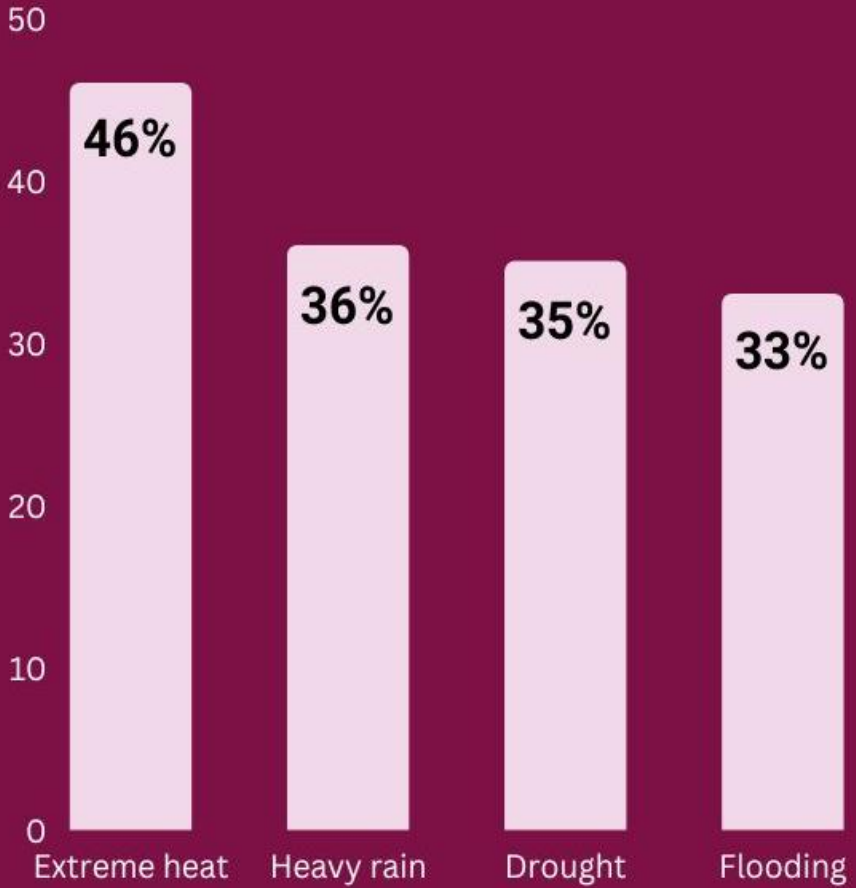

Reasons for not undertaking a CRVA:

- ▶ Lack of expertise/technical capacity
- ▶ Lack of financial capacity
- ▶ Higher priorities

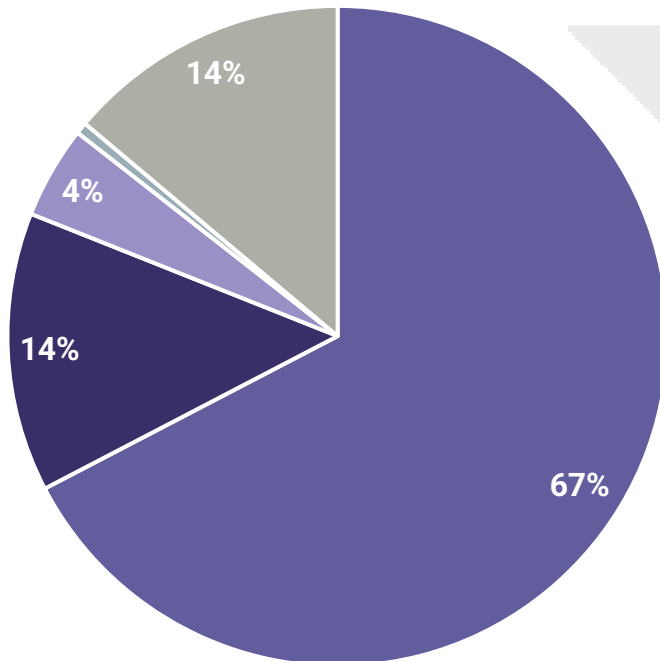

80% of cities report facing significant climate hazards.

Target

Adaptation goal(s)

- Yes
- No, but planning to introduce
- No, due to lack of resources or other reason
- No, and not intending to
- No response

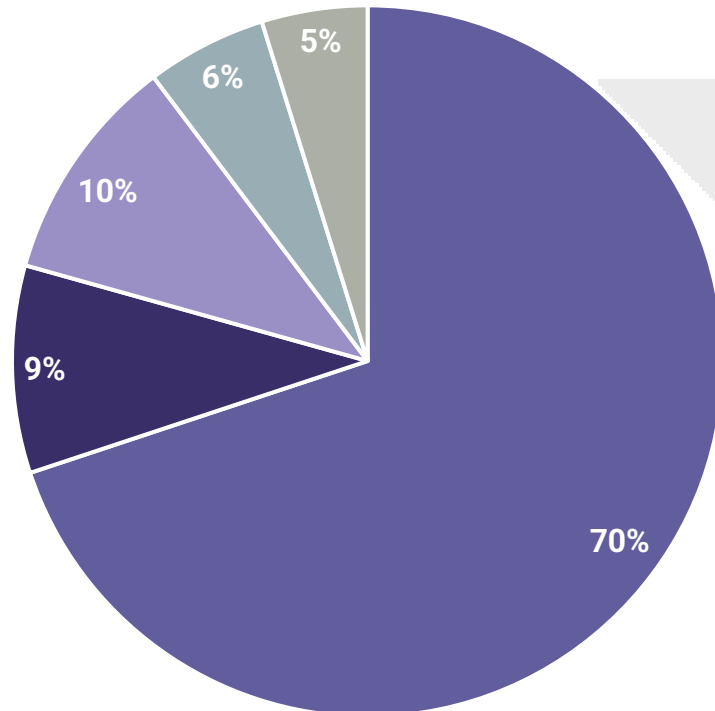

Examples:

- ▶ Achieve equitable access to green spaces
- ▶ Make neighborhoods and communities safer and more prepared by strengthening community, social, and economic resilience.
- ▶ Improve the resilience of urban water supply systems
- ▶ Achieve a net gain in biodiversity for new development

Planning

Climate action plan that addresses mitigation, adaptation (resilience), and/or energy

- Yes
- No, but currently undertaking
- No, but we are intending to
- No, and not intending to
- No response

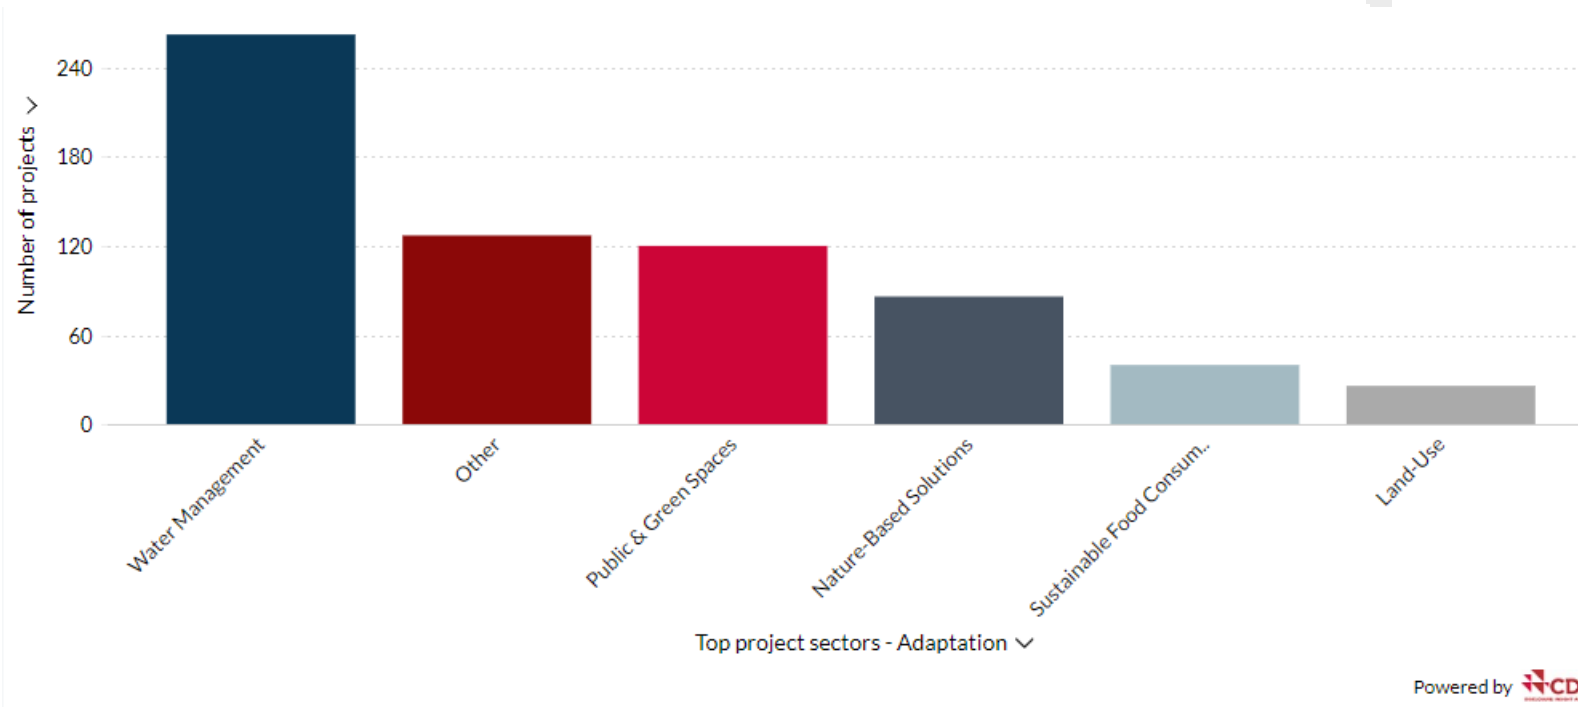

57% of plans address adaptation/resilience

Actions

Cities are pivotal in advancing climate adaptation and resilience

1/3 (727) of all climate infrastructure projects reported through CDP-ICLEI Track focus on increasing urban adaptation and resilience to climate change, with 55% reported by cities in the Global South. These projects are **collectively valued at US\$47 billion** and **seeking approximately US\$21 billion in investment**.
